FEMA Hazard Mitigation Plan Public Meeting on May 31, 2016

DeWitt County will hold a public meeting on **Tuesday, May 31** to gather public input for a FEMA Hazard Mitigation Action Plan, or *Plan*. Plan participants include unincorporated DeWitt County, the Cities of Cuero, Nordheim, Yorktown, and the DeWitt County Drainage District. The meeting is **from 6:00 – 7:00 p.m. at Cuero City Hall, 212 E. Main Street, Cuero, TX 77954**. The public, area businesses and organizations located throughout the planning area are invited and encouraged to attend.

Under the Disaster Mitigation Act of 2000, the Federal Emergency Management Agency (FEMA) requires communities to develop a mitigation plan to minimize or eliminate the long-term risk to human life and property from known hazards. *Mitigation* is defined by FEMA as sustained actions taken to reduce or eliminate long-term risk to people and property from hazards and their effects. Hazards that may pose risk and potentially result in disaster include drought, flood, hurricane, tornado, wildfire, and other high hazards.

Communities with a FEMA-approved Plan are eligible for certain grant funding under the Hazard Mitigation Assistance (HMA) program to fund critical projects such as Buyouts and Structural Elevation of repetitive flood loss structures, drainage projects, and hardening critical facilities to minimize future damage from natural disasters that affect the County planning area.

The purpose of the public meeting is to provide a project overview from LAN, consultant to the project, and solicit information from citizens. Public input will help the Planning Team to identify and analyze potential hazards affecting residents and recommend possible actions to reduce their impact throughout DeWitt County and the planning area.

Detailed information about the planning process can be obtained by contacting Cathy Meek, Project Manager, at (512) 420-6755 or CLMeek@lan-inc.com
